Opioid Risk Tool

Created by Dr. Lynn Webster, the Opioid Risk Tool allows individuals along with licensed trained professionals to develop an understanding the extent of one's addiction and/or dependence on opiates.

These behavioral patterns show the overuse of opiates, prescription sales, false reports of stolen pills, forgery of scripts and clinical appointment cancellations.

Complete the test by responding to each statement by checking the box to personal/family history of abuse.

Family History of Substance Abuse

- Alcohol
- Illegal Drugs
- Prescription Drugs
